Commission's Rules to Add Hazleton, )  
Pennsylvania and Williamsport, Pennsylvania )  
as Designated Communities in the )  
Wilkes-Barre-Scranton Television Market. )

To: Chief, Mass Media Bureau

**JOINT PETITION FOR RULEMAKING**

Diversified Communications ("Diversified"), The New York Times Company ("Times") and WBRE Associates ("WBRE"; and referred to jointly as "Petitioners"), by their respective counsel and pursuant to Section 1.401 of the Commission's Rules, 47 C.F.R. § 1.401, jointly petition the Commission to amend Section 76.51 of the rules, 47 C.F.R. § 76.51, to change the designation of the "Wilkes-Barre-Scranton, Pennsylvania" television market to the "Wilkes-Barre-Scranton-Hazleton-Williamsport, Pennsylvania" television market.<sup>1</sup> In support of this petition, the following is shown:

No. of Copies rec'd  
List A B C D E

244  
M M B 36

<sup>1</sup> The Petitioners further request Commission consideration of this Petition on an expedited basis pursuant to the Commission's *Report and Order in In re Implementation of the Cable Television Consumer Protection and Competition Act of 1992*, 8 FCC Rcd 2965, 2978 (1993). The Commission stated therein that requests for specific hyphenated market changes which appear worthy of consideration will be routinely docketed and issued a rulemaking proposal without first seeking comment on whether that step should be taken. *Id.* As demonstrated herein, this Petition is worthy of consideration and therefore should be docketed and issued as a rulemaking proposal.

## **Background**

According to the most recent Arbitron ratings,<sup>2</sup> the Wilkes-Barre-Scranton television market ranks fiftieth in the nation with 521,600 television households. The market's commercial television stations include WYOU-TV (Channel 22) a CBS affiliate; WNEP-TV (Channel 16) an ABC affiliate; WBRE-TV (Channel 28) an NBC affiliate; WOLF-TV (Channel 38), a Fox affiliate, and WWLF-TV (Channel 56) and WILF-TV (Channel 53), both satellites of WOLF-TV. WBRE-TV is licensed to Wilkes-Barre; WYOU-TV, WNEP-TV and WOLF-TV are licensed to Scranton; WWLF-TV is licensed to Hazleton; and WILF-TV is licensed to Williamsport. Noncommercial station WVIA-TV (Channel 44) is licensed to Scranton.<sup>3</sup>

As detailed more fully below, WYOU-TV, WNEP-TV and WBRE-TV all provide strong off-air service to Hazleton, and operate translators which provide strong off-air service to Williamsport. Moreover, the three stations provide virtually all off-air viewing and a preponderance of cable viewing in both communities.

Diversified is the licensee of WYOU-TV and has owned the station since July 1986. Times is the licensee of WNEP-TV and has owned the station since October 1985. WBRE is the licensee of WBRE-TV and has owned the station since May 1984.

Attached hereto as Engineering Exhibit 1 is a map that depicts the county boundaries of the Wilkes-Barre-Scranton Area of Dominant Influence (ADI). Included within the Wilkes-Barre-Scranton ADI are Luzerne and Lycoming Counties, within which Hazleton and Williamsport, respectively, are located. Engineering Exhibit 1 also shows the Grade B contours of the market's operating commercial stations and the thirty-five mile cable carriage zones

---

<sup>2</sup> See Television & Cable Factbook, Vol. 61, 1993, at A-960.

<sup>3</sup> Ehrhardt Broadcasting holds a construction permit for Channel 64 in Scranton. The station is not yet on the air.

centered on each community. As noted therein, Hazleton is well within the Grade A contours of WYOU, WNEP and WBRE. Williamsport is encompassed by the Grade B contours of WYOU and WBRE; it falls slightly beyond the Grade B contour of WNEP. As shown in Engineering Exhibit 1, substantial portions of the area comprising the market ADI are beyond the composite 35 mile zones centered on Scranton and Wilkes-Barre.

The commercial television stations licensed to the market are entitled to "must carry" status in Hazleton and Williamsport and Luzerne and Lycoming Counties in accordance with Section 617 of the Communications Act of 1934, as amended by Section 4 of the Cable Television Consumer Protection and Competition Act of 1992 ("1992 Cable Act"). However, the signals of Petitioners' stations may be considered "distant signals" under Section 111 of the Copyright Act, 17 U.S.C. § 111, in at least some of these areas. This Petition asks the Commission to add Hazleton and Williamsport as designated communities to the Wilkes-Barre-Scranton television market by amending Section 76.51 of the Commission's Rules, 47 C.F.R. § 76.51. This amendment will ensure that the local ADI stations are, in fact, reasonably available for carriage throughout the Wilkes-Barre-Scranton television market consistent with the ADI marketplace approach adopted in the 1992 Cable Act.

**The Commission Should Amend Section 76.51 Of  
The Rules To Add Hazleton And Williamsport To  
The Wilkes-Barre-Scranton Television Market**

As referenced above, Section 614(f) of the 1992 Cable Act requires the Commission, following a rule making proceeding, to make necessary revisions to update Section 76.51 of the Commission's Rules, 47 C.F.R. § 76.51. Section 76.51 lists the one-hundred major television markets and their designated communities for purposes of the cable rules. Id.

The Commission has stated that it "will only update the existing list [in Section 76.51] by adding those designated communities requested by the parties providing specific evidence that change to a particular market is warranted." In re Implementation of the Cable Television Consumer Protection and Competition Act of 1992, Report and Order, MM Docket No.92-259 FCC 83-144, (released March 29, 1993), (hereinafter the "Cable Report"). Petitioners submit that the evidence contained herein supports the requested redesignation of the Wilkes-Barre-Scranton television market.

The 1992 Cable Act creates a totally new "must carry" standard premised upon ADI defined market areas. As a result, the appropriate designation of listed communities for purposes of Section 76.51 becomes more critical than under earlier regulatory schemes premised on arbitrary mileage zones and/or coverage contours. Moreover, although the new "must carry" rules rest on a dramatically different standard, the Petition is consistent with earlier cases which involved revisions of Section 76.51 under the earlier cable regulatory schemes. For example, in Television Muscle Shoals, Inc., 48 RR 2d 1191 (1980), recon. denied, 87 FCC 2d 507 (1981); Major Television Markets (Orlando-Daytona Beach-Melbourne-Cocoa), 57 RR 2d 685 (1985) (hereinafter "Orlando-Daytona Beach"); and Major Television Markets (Fresno-Visalia, California), 57 RR 2d 1122 (1985) (hereinafter "Fresno-Visalia"), the Commission noted four factors that are applicable to petitions to add a community to an existing television market designation. Those factors include:

- (1) the distance between the proposed community and existing designated communities; (2) whether a station would be afforded expanded carriage rights beyond its Grade B contour; (3) the presence of a clear showing of particularized need by a station requesting a change of designation; and (4) an indication of benefit to the public from the proposed change.

Fresno-Visalia, at 1124.

Petitioners submit that the application of the above factors to this and similar petitions should be tempered in recognition of the significant changes occasioned by the 1992 Cable Act. As noted, the 1992 Cable Act rejects the previously used thirty-five and fifty-five mile zone concepts and station coverage contours to define the cable-television station carriage relationship in favor of the more realistic ADI market-based standard. The ADI defines the geographic area within which television households predominantly view certain local stations, a simple and more reasonable approach that better reflects the real world competitive situation within a television market.<sup>4</sup> However, in order to make the ADI concept function as anticipated in the Wilkes-Barre-Scranton television market, the Commission must adjust the market definition to add Hazleton and Williamsport as designated communities. Otherwise, a substantial number of cable subscribers within the market may be unable to view the local stations because potential copyright liability will make their carriage unattractive and prohibitively expensive.

One factor used by the Commission to analyze a request to add communities to an existing television market designation are the distances between and among relevant communities. In this case, Hazleton is twenty air miles from Wilkes-Barre and thirty-five air miles from Scranton; Williamsport is fifty-nine air miles from Wilkes-Barre and seventy-one air miles from Scranton. These relatively short distances fall within the range of distances considered favorably by the Commission. For example, in Orlando-Daytona Beach, the Commission granted a request to include Melbourne in the Orlando-Daytona Beach television market despite the fact that Melbourne is seventy-five miles from Daytona Beach. Id.

---

<sup>4</sup> In Report and Order, MM Docket No. 92-306 (May 19, 1993) (hereinafter "Clermont Florida"), the Commission added Clermont, Florida, to the Orlando-Daytona Beach-Melbourne-Cocoa market noting that "Arbitron's conclusion that Clermont is within the Orlando-Daytona Beach-Melbourne 'area of dominant influence' also supports this conclusion." Para. 3.

at 692. Here, the farthest distance between any of the communities (Williamsport and Scranton) is seventy-one miles. And, the distances between any of the remaining communities are substantially less.

A second factor considered by the Commission, but one we submit that is seriously eroded by the new cable must carry rules, is whether stations would be granted expanded carriage rights beyond their Grade B contours. In this case, the Grade A contours of WYOU-TV, WNEP-TV and WBRE-TV fully engulf the community of Hazleton. The Grade B contours of WYOU-TV and WBRE-TV encompass Williamsport. Although Williamsport falls slightly outside the Grade B contour of WNEP-TV, this is not significant. For example, in Orlando-Daytona Beach, the Commission acknowledged that WMOD-TV's Grade B contour did not extend to Daytona Beach; however, the Commission recognized that portions of a single television market are "occasionally" located beyond the Grade B contours of some market stations. Id. at 691. Moreover, as noted, the relevance of station contours is diminished significantly under the 1992 Cable Act where television stations enjoy must carry status throughout the market ADI regardless of contour location. And, the Scranton-Wilkes-Barre ADI includes the areas encompassed by the Hazleton and Williamsport thirty-five mile cable carriage zones so that all of the market stations are entitled to "must carry" status regardless of the location of grade A and B contours.

Of course, mileage separations and the location of coverage contours fail to consider the commonality among the communities. The Wilkes-Barre-Scranton television stations serve Northeastern and Central Pennsylvania (areas which clearly encompass Hazleton and Williamsport) and focus much of their local news coverage on events that are relevant to those areas. For example, WYOU-TV maintains full scale news bureaus in both Luzerne and Lycoming counties; twice each day WYOU-TV airs "The Williamsport Report," a newsbreak

that focuses solely on events in the Williamsport community and aired on Diversified's low power station operating on Channel 55 in Williamsport. In addition, WYOU-TV regularly airs live reports from Williamsport on events ranging from high school basketball games to the Boom Festival Parade. Attached hereto as Exhibit 2 is a random survey of stories WYOU-TV aired concerning events in Williamsport and Hazleton in June, 1993. The stories range from the demolition of a Williamsport drug house to bus fares rising in Hazleton.

WNEP-TV also provides extensive news coverage of both Hazleton and Williamsport. In a one-week period in April 1993, a random survey, attached hereto as Exhibit 3, revealed that WNEP-TV aired more than twenty reports on events in Hazleton. A random, month-long survey of WNEP-TV'S news coverage of Williamsport, also demonstrated in Exhibit 3, showed a similar pattern: WNEP-TV aired more than thirty stories impacting Williamsport citizens in April 1993.

WBRE likewise has close and ongoing ties to both Hazleton and Williamsport. Exhibit 4 hereto provides a representative sample of recent news stories focusing on each community. At present, two staff members of WBRE's Eyewitness News team, one a reporter and the other a producer, contribute special insights by virtue of being life-long residents of Hazleton. In addition, WBRE's television news is regularly simulcast on two Hazleton radio stations. With respect to Williamsport, WBRE has maintained a special News Bureau in that city for 15 continuous years. With a full-time staff of two professionals and a dedicated microwave link running between its Williamsport News Bureau and main studio, WBRE generates a steady stream of news and sports from and for Lycoming County.

This type of coverage is understandable given the fact that the four communities of Wilkes-Barre, Scranton, Hazleton and Williamsport share many needs and interests. The Susquehanna River links all four areas, winding its way through Wilkes-Barre and Williamsport

and drifting near Scranton and Hazleton. All four communities are in the same Congressional District. High school sports teams from the communities compete against each other. Historically, mining and lumber industries created an economic boom for all four communities, each area became economically depressed as these industries declined, and now all areas are experiencing an economic resurgence as a new service industry economy is developing.

It should also be noted that WYOU-TV, WNEP-TV and WBRE-TV employ translators and low power stations to increase service to the Hazleton and Williamsport areas. For example, WYOU-TV is licensed to operate two facilities in Williamsport (W55AG and W26AT). WNEP-TV has one translator in Williamsport (W20AD) and one in Pottsville (W61AG), which is south of Hazleton. WBRE has one in Williamsport (W30AN) and one in Pottsville (W24BL).

In Orlando-Daytona Beach, the Commission stated it believes that "television stations actually do or logically can rely on the area within their Grade B contours for economic support." Id. at 690. In this case, the market stations do rely on advertising revenues from Hazleton and Williamsport which are part of their ADI. As noted by the Commission in Clermont Florida, the allocation of Hazleton and Williamsport to the Wilkes-Barre-Scranton ADI evidences the economic interdependence of the area.<sup>5</sup>

Another factor evaluated by the Commission is "the presence of a clear showing of particularized need by a station requesting a change in designation." Fresno-Visalia, at 1124. Hazleton, Williamsport and the surrounding areas are included as part of the Wilkes-Barre-

---

<sup>5</sup> Commercial channel 20 is allocated to Williamsport although a station on that channel is not operating. However, any station in Williamsport must have Williamsport added as a designated community in the Wilkes-Barre-Scranton market in order to have any chance of success. This is the economic reality that, in part, persuaded the Commission to add Melburne, then Cocoa and finally Clermont to the Orlando-Daytona Beach market. While channel 56 (WWLF) operates successfully in Hazleton, and channel 53 (WILF) just began operation in Williamsport, they do so in conjunction with channel 38 (WOLF) in Scranton as Fox affiliates.

Scranton ADI. However, because television viewing in Hazleton and Williamsport is dominated by the Wilkes-Barre-Scranton stations, neither community could exist as its own market.

Finally, Arbitron surveys, attached hereto as Exhibit 5, reveal the undisputable television market connection between Petitioners and the communities of Hazleton and Williamsport. For example, according to Arbitron's Pennsylvania County Coverage Book for 1992, Wilkes-Barre-Scranton television stations obtained a ninety-nine percent (99%) viewing share in non-cable homes and a seventy percent (70%) share in cable homes in Luzerne County, in which Hazleton is located, and a ninety-four percent (94%) share in non-cable homes and a fifty-nine percent (59%) share in cable homes in Lycoming County, in which Williamsport is located.

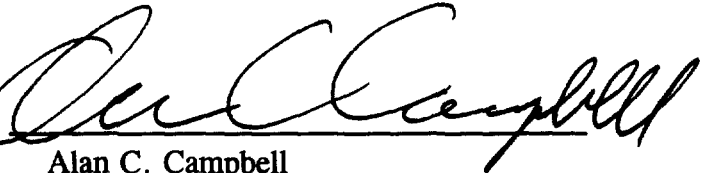

### **Conclusion**

The new cable regulatory scheme relies on the ADI in order to be reflective of the true marketplace conditions. Including Hazleton and Williamsport in the Wilkes-Barre-Scranton television market would put all commercial television stations in the market (including future licensees of the two channels allocated to Williamsport) on an equal competitive level, as well as providing cable subscribers throughout the ADI with equal access to commercial television stations in the market. It is the Commission's policy that "competition among all market stations be equalized by providing all stations and all cable subscribers access to each other." Orlando-Daytona Beach, at 692, 693. By amending Section 76.51 of the Rules to include Hazleton and Williamsport in the Wilkes-Barre-Scranton market, the Commission will remove any copyright constraints that may otherwise inhibit carriage of the market stations throughout the ADI. An accurate reflection of true marketplace conditions will be achieved

through the amendment of Section 76.51 by expanding the Wilkes-Barre-Scranton television market to include Hazleton and Williamsport.

For the reasons set forth herein, Petitioners urge the Commission to amend Section 76.51 of the rules, 47 C.F.R. § 76.51, to redesignate the Wilkes-Barre-Scranton television market as the Wilkes-Barre-Scranton-Hazleton-Williamsport television market.

At the request of Diversified Communications, licensee of TV station WYOU(TV), Scranton, Pennsylvania, the attached maps, Figures 1 and 2 were prepared.

Both maps show the Wilkes-Barre/Scranton Arbitron ADI as taken from the Stations Volume No. 61 1993 Edition of the Television & Cable Factbook.

Map Figure 1 depicts the Grade B contours of the commercial TV stations licensed to Wilkes-Barre, Scranton and Hazleton, Pennsylvania. These stations are:

| <u>Station</u> | <u>Community</u> | <u>Channel</u> | <u>ERP</u><br>kW | <u>HAAT</u><br>meters |
|----------------|------------------|----------------|------------------|-----------------------|
| 1) WYOU(TV)    | Scranton, PA     | 22             | 2950             | 505                   |
| 2) WOLF-TV     | Scranton, PA     | 38             | 1290             | 385                   |
| 3) WNEP-TV     | Scranton, PA     | 16             | 1150             | 506                   |
| 4) WBRE-TV     | Wilkes-Barre, PA | 28             | 3020             | 509                   |
| 5) WWLF(TV)    | Hazleton, PA     | 56             | 1000 DA Max.     | 329                   |

The Grade B contours were computed using pertinent FCC Rules and Standards.

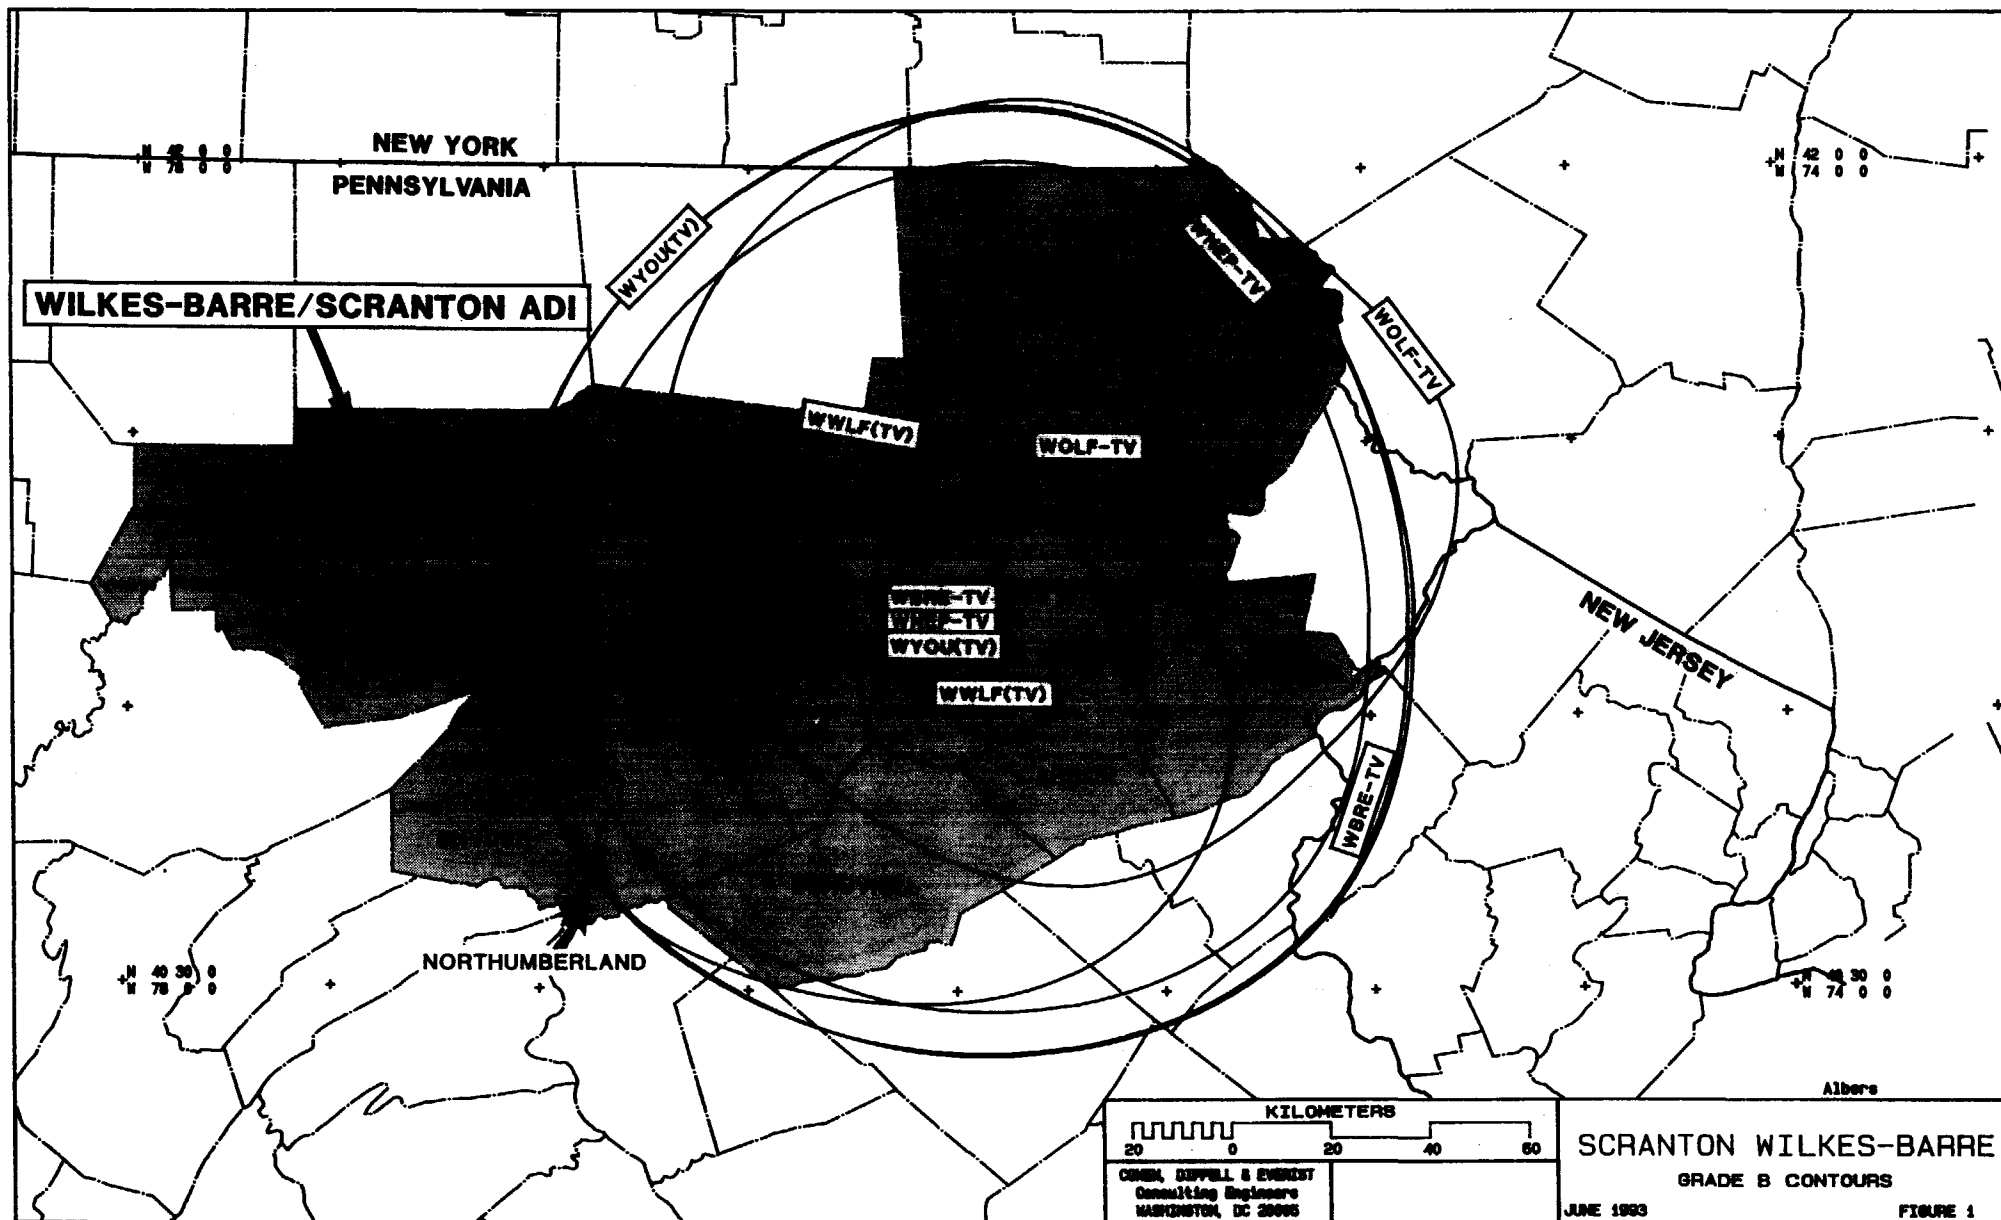

Map Figure 2 depicts the 35 mile circle from either Section 76.53 reference points or the National Atlas index of coordinates for the following cities:

| <u>Community</u>                  | <u>Coordinate</u> |             |
|-----------------------------------|-------------------|-------------|
| 1) Scranton, PA <sup>1/</sup>     | 41° 24' 32"       | 75° 39' 46" |
| 2) Wilkes-Barre, PA <sup>1/</sup> | 41° 14' 32"       | 75° 53' 17" |
| 3) Hazleton, PA <sup>2/</sup>     | 40° 57.3'         | 75° 58.6'   |
| 4) Williamsport, PA <sup>2/</sup> | 41° 14.7'         | 77° 00.2'   |
